

Minseok Yu

AI Content Marketer Intern | AI Creative / Content Marketing

Seoul, Korea | +82 10-4229-9239 | aheayabaraya@gmail.com

Profile

- Entry-level AI creative and content marketing candidate with a Fashion Marketing background and portfolio projects in AI short-form ads, AI idol/IP content, and product-facing GTM content.
- Strong fit for W3Company's AI Content Marketer role: I understand Moji as a casual global friendship/language-exchange app and SeriUs as a trust-based serious international dating app, then translate each service tone into social/ad creative directions.
- My working style is AI-native planning first: concept, storyboard, prompt system, asset generation, review, revision, and social/ad-ready output. I build and compare creative candidates to learn what hooks, scenes, and formats can drive engagement.

Core Skills

- AI-native content planning: concept boards, campaign hooks, storyboards, short-form ad flow, copy direction, service-tone adaptation.
- Generative AI workflow: Grok/GPT/Codex workflow, Suno, Seedance 2.0, Kling, Grok Imagine, Midjourney, Gemini, Nano Banana.
- Production and publishing tools: Adobe Premiere Pro, Photoshop, CapCut, web/portfolio publishing, YouTube/TikTok/X content routing.
- Marketing perspective: campaign message structure, app/service public content, CTA flow, KPI/event tracking design, feedback-based iteration.
- English communication: SFTI-CMU English abstract and poster-style research communication.

Selected AI Creative and Marketing Projects

MUSINSA Mujinjang AI Short-form Ad

Competition project, 3-person team | Jun 2026

- Translated the campaign message "Break bias, wear diversity, meet Mujinjang" into a 30-second AI short-form ad concept.
- Built message structure, main storyboard, scene order, and production flow so the ad stayed campaign-led rather than just visually generated.
- Generated and reviewed image/video candidates with GPT, Seedance 2.0, Kling, and Grok, then adjusted cut flow and transitions for a social-first rhythm.

Loom / Pulso AI Idol IP Content System

Personal AI creative project | May 2026 - Jun 2026

- Designed a 13-member AI idol IP system across member identities, tracks, MV-style scenes, short-form clips, web archive, and fan-participation surfaces.
- Built a repeatable AI production loop using Grok/GPT/Codex for planning and prompt structuring, batch image candidate generation, Grok Imagine video candidates, and CapCut/Codex edit checks.
- Expanded Pulso from a core video concept into TikTok/X-style short-form cuts and track-board content for audience-facing distribution.

ADSB AI-assisted Fashion Brand Short-form

Academic-industry collaboration | Sep 2025 - Nov 2025

- Researched Andersson Bell's brand mood and converted it into shot flow, storyboard direction, and a 15-second AI-assisted short-form proof.
- Created and revised image/video clip candidates using Midjourney, Gemini, Nano Banana, Photoshop, Kling, and Adobe Premiere Pro after practitioner feedback.
- Focused on matching brand tone and visual rhythm, not only on tool output quality.

AHEYA Product GTM / Public Content

Personal service prototype | Sep 2025 - Mar 2026

- Structured public-page messaging, X post concepts, CTA flow, and character/world visual assets for a Web3 service prototype.
- Converted complex wallet/testnet participation into user-facing actions such as support, feedback, share, and save.
- Designed KPI/event tracking logic around visit, support intent, feedback, share, and saved-record events so content and product decisions could be reviewed without overstating growth results.

SFTI-CMU Research Communication

International conference material | May 2025 - Jun 2025

- Developed the English abstract and poster-style structure for "AI-Generated Emotional Content Strategy for Niche Fashion Brands: Toward Identity-Based Visual Clustering."
- This framing later informed AHEYA's visual identity and emotional content direction.

Experience

Teaching Assistant, Global Fashion Industry Department

Hansung University | Sep 2024 - Dec 2025

- Supported class operations, studio/classroom materials, student inquiries, documents, and academic administration.
- Helped new faculty classes run smoothly by organizing communication and class preparation details.

Education

- Hansung University, B.A. Fashion Marketing, expected Aug 2026

Languages

- Korean: Native
- English: Conversational, OPic IM, Apr 23 2025
